

Care Instructions

General dirt and stains

1. Firstly, excess liquid should be blotted with an absorbent paper or cloth so as to remove most of the liquid from the surface.
After this, rub the fabric gently with a white paper or white cloth to absorb the remaining dampness.
2. The easiest way to clean is using a wet wipe or using a clean white cloth dampened with plain water. Gently rub the area of stain using small circular motions. Do not soak the fabric in the solution as excessive soaking can cause damage. More persistent stains may need a solution of 95% water and roughly 5% soap (a gentle washing up liquid is recommended).
3. Allow the cleaned area to dry completely and then gently brush or vacuum with a soft brush the area that was cleaned using strokes in the direction of the pile of the fabric.
4. More persistent stains may need a second treatment after allowing the fabric to dry.
Stains of ballpoint pen, grease etc may not come out easily using the above treatment and cleaning with a diluted solution of ISOPROPYL ALCOHOL using a white cloth will then usually help.

Washing (Loose Covers)

Loose covers made from Impala can be washed in the washing machine at a maximum temperature of 40°C using neutral detergents only.

- Do not use bleach
- Avoid drying in the sun
- We do not recommend dry cleaning
- We recommend tumble-drying
- Iron only on the rear side of the fabric at a maximum temperature of 110°C
- After ironing freshen up the fabric by using a soft brush
